

SEMI on Campus

University of Catania

Wednesday April 15, 2026, start at 09:30 am

Aula Magna Ingegneria Ed.14 Cittadella Universitaria

Do YOU want an opportunity to help shape the world to become a better place, through the design, manufacture, and application of semiconductor chips, fundamental to problem solving and sustainable progress?

Whatever your study discipline, come and listen to Bernie Capraro, a semiconductor industry veteran with over 36 yrs experience, talk about his career that helped produce technology that drives our modern world. Also, young semiconductor professionals from ST will talk about their early career activities, and the opportunities and impact they are already experiencing. From chip designer to manufacturing engineer or technician, to software programmer, to environmental health and safety expert, to sustainability engineer, to sales and marketing and legal and finance professionals, there's an exciting career for you ALL within the Semiconductor Industry.

Bernie Capraro
